Opal Coffee
Specialty Green

HISTORY

Cattura/Catuai is a high yielding coffee plant resulting from a cross between Mundo Novo and Caturra. The plant is relatively short, and the lateral branches form close angles with the primary branches. The fruit does not fall off the branch easily, which is favourable with areas with strong winds or rain.

PRODUCER

Francisco A Mena

LOCATION

 COUNTRY
COSTA RICA
 REGION
TARRAZÚ

 ALTITUDE
1745 MASL

VARIETALS

CATURRA

TECHNICAL

HARVEST
JAN-MAR
OCT-DEC

PROCESSING METHOD
WHITE HONEY

CHARACTERISTICS

CITRUS, GRAPEFRUIT WITH PLUM AND LEMON, BODY IS TEA-LIKE AND HIGH CITRUSY ACIDITY, SWEET, JUICY, AND ALL IN PROPORTIONAL BALANCE.
