Opal Coffee
Specialty Green

HISTORY

Ethiopia is recognised as the country where Arabica coffee flourished to become specialty coffee and keep the industry alive. Due to the genetic potential of the land, the region has the capabilities to produce delicious and complex flavours, unlike anywhere else in the world.

The history and mystery of coffee's discovery and early cultivation in Ethiopia intrigues self-described coffee nerds. Ethiopia's traditional coffee ceremonies inspire coffee pros from around the world to pause, slow down and savour the full experience of preparing or enjoying coffee.
