HISTORY

This washing station, founded in Limu Kossa is managed by full-time farmers, that focus on cultivating exquisite Ethiopian heirloom varieties across 3250 hectares of land.

These farms cultivate their heirloom varieties to be as close to their wild-grown counterparts as they can, made possible by exceptional agroforestry practices. The plants grow in the shade of 43 different species of trees, allowing for slow cherry development and beans that are more dense and flavourful.

PRODUCER

YIDNAKACHEW DABESA

LOCATION

COUNTRY
ETHIOPIA

REGION
JIMMA ZONE, OROMIA

ALTITUDE
