HISTORY

Uraga is a resourceful area with very fertile land, great coffee and a flourishing mining business. Most of the coffee trees in this area are pretty young and their varieties is usually 74410 & 74412. These two varieties have shown the most resistance to Uraga's environment whilst still displaying its coffee profile. Farmers Zelalem collects his coffees from an average area of 1.4 hectares of land which were passed down from previous generations.

Guji is a zone in the South-Eastern Oromia. Guji produces excellent coffee due to the land being an untouched forest for the longest of times making the land very fertile.
