HISTORY

In Banko Gotiti The coffee grows in high altitude above 2200 masl. The district is called Gedeb and known for its high quality coffee. There are 400-700 farmers who live in 2- 3 km radius around the washing station and who supply their cherry to the washing station. The average farm size is ½ hectare and coffee is grown at the backyard of the household.

Farmers usually put animal remains as natural fertilizer and no chemical fertilizer is applied for coffee grown in such areas. Also farmers grow other cereals and fruits for their household consumption.
